

What feature of an F1 racing car make it capable of outcompeting other F1 cars in a race?

It is of course all these attributes, operating together and sometimes against one another sequentially (e.g. engine power and brakes), that confer competitive success. So it is with leaf attributes (characters). All their functions are interconnected so we need sophisticated multivariate methods to examine their relationships to one another and to climate.

Scorer	Locality	Latitude	Longitude	Altitude	Date Collected	Completeness	Notes		
ABH	Bol'shoy Canyon	44.4°N	33.8°E	600-800m	31/08/02, 5/	1			
	Big Canyon of Crimea
